

In times of destruction and threat posed to cultural heritage by violent conflicts and increasing climatic changes, the question of meaningful ways of preserving cultural heritage, not least in the context of digital presentations, plays an increasingly important role. The international workshop brings together academics from a wide range of disciplines to discuss current projects on the digitisation of cultural heritage. The workshop deliberately focusses on administrative technologies in order to gain as many insights as possible into different fields of research across disciplinary borders.

Venue

Karl Jaspers Centre
Voßstr. 2, Building 4400
Room 212
